Ega® PVC Conduit & Fittings

Ega® PVC conduit is one of the staple products for commercial, residential and industrial electrical installations. Conduit can be buried in concrete or plaster at the construction stage or externally mounted for easy access. The Ega® Conduit System offers many solutions to every electrical challenge for contractors, installers and end user.

Ega® PVC Trunking & Fittings

This offers a cost effective and eye catching finish to any décor and can be painted to complement any colour scheme. Ega® trunking can also be quickly installed with just a snap to secure covering in place. It can also be easily tailored to any room configuration.

The Ega® Compact Mini Trunking system is popular for commercial and home refurbishment projects where it can be swiftly installed as a surface mounted system, tailored to any room configuration. The system can also be quickly extended to accommodate new appliances, lighting equipment and other requirements.

Ega® Industrial Trunking is available in a range of sizes and is also one of the 'standard' industrial and commercial installation products. It is frequently specified for installations requiring long runs of trunking; where access to the wiring system is required; and for projects where an extensive range of accessories and fittings will be involved in matching the installation requirements.

Ega® Electrical

Mini - Trunking Fittings

Description	Part No.	Size	SP	MC
